

Funk in the Trunk

People always ask me, every single day

“When we come and see you, what you gonna play?”

“Is it rap or reggae, is it folk or trance?”

I always say the same thing, come prepared to dance!

Cos we play a little soul, with some funk in it

We play a little blues with a little bit of funk.

We play a little rock and we add some funk with it

Play a little jazz and we add a bit of funk in the trunk!

All you really ever need is what I'm telling you

You don't need booze or reefer, no powder or pills

You don't need poison in your body to fix up all your ills
